

Silvertech

Systems Designers • Control Engineers

what our clients say about us...

'We would like to express ADCO/FWEL's appreciation for the efforts made by Silvertech in the timely and professional execution of this supply. Many of your staff were responsible for this performance; too many to recognise individually. Please congratulate them on our behalf.'

**Abu Dhabi Company for Onshore Oil Operations
& Foster Wheeler Energy Limited**

'We would like to thank you, and your colleagues, for all your efforts in providing us with a most effective and efficient service leading to the recent successful offshore commissioning of the HVAC Control System. We set you a very tall order to design and build this system, commencing with our first meeting to proceed with the work... you successfully delivered the fully tested panels, to our great satisfaction, - on time early... This despite a number of changes along the way.'

AMEC Engineering

'With the achievement of 'Gas Contracted Sales to Unit Buyers'... Britannia has achieved its most important milestone. This milestone also marks the end of the Project Commissioning Phase and the commencement of the Platform Operating Phase. The above achievement has been made possible by the efforts of many people, all who have played a part to ensure the success of Britannia. Nowhere, have these efforts been more significant than those made by the members of the PCS Team. To metamorphosis the System that was delivered to site in 1996, to that currently controlling and monitoring the Platform Systems today, is a very significant achievement, and one that all involved should be proud of.'

Britannia Operator Limited

'Gate D of the Thames Barrier was successfully commissioned in the time allocated. I would like you to know how favourably impressed I was with the splendid efforts made by your team to achieve this within the very tight programme I had set. Their dedicated application to the task brought great credit to Silvertech.'

National Rivers Authority (Environment Agency)

'I should like to thank you for providing us with assistance during a recent breakdown of our production plant... Your men provided a service 'second to none' that evening. They worked very hard from the moment they arrived, showing great skill and expertise, until some 6 hours later they had the plant running. Your response to our request was excellent.'

Cyanamid (UK)

'Thank you all for the sterling effort expended by yourselves, which resulted in three most successful training sessions. Without exception, the feedback from our offshore personnel has been very positive and full of praise for the way the training was planned and executed... I would be grateful if you could pass on our thanks for a job well done, to everyone who took part in the training.'

BP Exploration, Schiehallion

'In addition to the successful delivery of our systems, Silvertech also provided on site installation supervision, commissioning, training, and support services including on site engineering and software change activity. The flexibility and professionalism of Silvertech's personnel was recognised by ourselves and the client, and they were integrated into our platform commissioning team. This extended to include the support of third party package equipment commissioning.'

Sembawang Engineering

'We wish to formally thank you and your project team on Millom West for completing the supply of the platform Control System on schedule to enable our construction program to go ahead as planned. Please pass our thanks to everyone at Silvertech who was involved with this project especially the team involved with the FAT. We are aware of the dedication of the team during the latter stages of the project to produce the system on time and for this we warmly congratulate you.'

Genesis Oil and Gas Consultants Ltd

'Silvertech has supplied nineteen control panels for a refinery site at Cadereyta, Mexico. The engineering design and build were completed on schedule in twelve weeks. The quality and standard of all aspects has been excellent.

I would recommend Silvertech Systems Inc. without reservation.'

Siemens Power Generation (KWU)

'Could you please pass our thanks and appreciation to the whole Silvertech team for the timely and professional manner in which they have executed the difficult upgrade of Huntington WTW's control SCADA systems. Achieving, and in many areas exceeding, the greater level of plant control and monitoring required by North West Water. I was particularly impressed by your teams conversance with the differing ranges of technologies on site, which lead to the seamless integration of our disparate plant wide systems.'

Montgomery Watson Harza

'Will you please pass on our thanks to Silvertch for the assistance in commissioning the fine water mist systems on the Forties Charlie MOL turbines P-04, P-05 and P-06. These machines are critical for maintaining export of oil from the platform and Silvertch took all of the necessary precautions to prevent any shutdowns from occurring whilst the commissioning activities were undertaken.

The platform were very nervous initially about undertaking the work, but by having Silvertch on board gave them the confidence to allow them to proceed. The work was completed in a very safe manner with Silvertch taking no chances.'

Wood Group and BP

'Silvertch has been a vendor/partner to Varco/Schaffer for over four years, working to develop sophisticated BOP Control Systems for the Deep Water Drilling Market. The partnership developed between the two companies is based on a sound working relationship built on mutual trust and sound engineering and manufacturing principles. Over the past four years this relationship has resulted in sixteen systems being successfully commissioned and deployed worldwide in the offshore drilling industry. These systems form part of the latest generation of offshore BOP systems that are capable of operating at ocean depths of up to 10,000 feet.

Silvertch's consistent performance through many difficult phases of engineering development has been excellent. Their capability to meet short deadlines and deliveries, whilst maintaining quality has been exemplary.'

Varco Drilling Equipment

'The project had a safety system scope of approximately 2,600 I/O and 260 logic diagrams. The project schedule was extremely tight with little float where the safety system was just under the critical path.

Silvertch responded with resources and aggressively deciphered a confusing database, cross referencing it to the logic diagrams. They communicated with the project team and submitted engineering progress for review by the client in a timely manner.

Silvertch was aware of the client requested schedule and collaborated with our engineers to achieve the milestones. The Silvertch work was accurate giving Honeywell engineers confidence in their ability.

Silvertch contributed to a successful project.'

Honeywell Inc.

'On behalf of the Russian Fissile Material Storage Facility Project, I wish to commend you and your team for your exemplary efforts in the execution of the Integrated Control System for our project. Your ability to produce a quality product while maintaining an extremely ambitious schedule is recognised as an extraordinary achievement and one that should be regarded with well earned pride.

Your hard work, dedication and the manner in which Silvertch conscientiously performed its duties has enabled the Integrated Control System phase of the Russian Fissile Material Storage Facility project to maintain its critical schedule.

I would like to extend our sincere thanks and appreciation for a job well done.'

Bechtel

“
What our clients say
about us
”

'You will be pleased to hear that the auditors verbally expressed the view that the work performed by Silvertch in respect of Y2K verification of the Platform Control System and Electrical Power Control System was well structured in approach, well documented and performed to a high standard. I would like to take this opportunity to thank you and your team for their efforts in respect of the Britannia Platform Year 2000 Verification process.

AMEC Process & Energy Ltd

'I wish to express my appreciation to Silvertch for their excellent performance regarding the implementation of four recent projects for Noble Drilling Inc. Noble Drilling contracted Silvertch to design, configure / program, and fully integrate critical ballast control solutions using redundant PLCs. Silvertch also included the operators console with multiple operator workstations using touch screen graphics for the HMI Interface.

The systems were delivered on or before the scheduled time in more than satisfactory manner. Thanks for a job well done.'

Noble Drilling Services Inc.

'In recognition of the great contribution that Silvertch have brought to the BOL operations during the last term, BOL would wish to undertake a contract for a further three year term.'

Britannia Operator Limited

'I would like you to pass on BP Projects Group and my own thanks to the Project Team for an excellent result. In sixteen weeks you have assisted BP Projects group to develop a recovery plan for the BP Bitumen Tanker Filling system, implemented the solution, performed a successful FAT with BP AMOCO refinery personnel in attendance, created an interface to the ORACLE database and delivered operator and maintenance training to the end users.

I have received positive feedback from BP AMOCO personnel at all levels on both the solution developed and Silvertch's overall performance which is something to be proud of.'
